

WEDGE-TIE

A BETTER PERFORMING TIE THAT ALSO CREATES WEDGES FOR THE NEXT WALL!

- WEDGE-TIES available from **6" to 120" in length**.
- During Break Back your tie now provides you with **two wedges** which are easily modified into your desired shape.
- It's unique shape makes for **easy and reliable visual quality control**, ensuring 100% tie placement and reducing the likelihood of a blowout.
- The tapered end makes it a **perfect pass thru tie**, reducing set-up time and if one is missing, one can easily be added.
- All WEDGE-TIES have the required **2-to-1 safe working load exceeding 7400 lbs.**
- Like all ties, there is a notch for rebar setting. JOS Systems also added a hole to ensure **no movement when tied**.
- One end of the tie can be made square.
- The strength of the wedge material is **ideal for driving into green footer** to keep forms in line
- Exterior ties, if left unbroken, allow for a **simple, fast, no cost press-on application of insulation.**

NEW!

THE BENEFITS TO YOUR BUSINESS

You'll never have to buy another wedge!

Reduces your set-up labor!

Eliminates the concern for lost wedges or failing to ship enough to the job site.
